

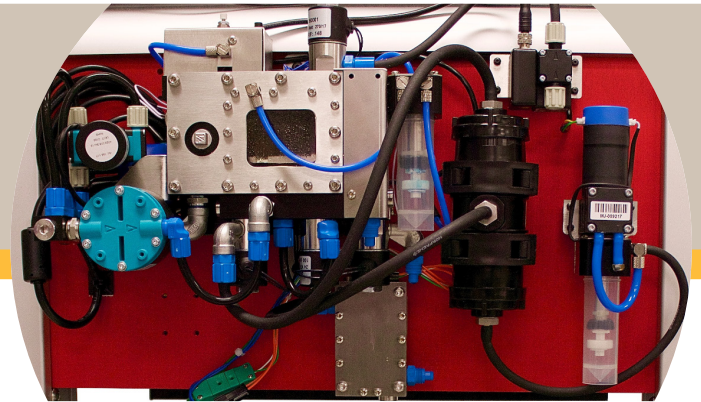

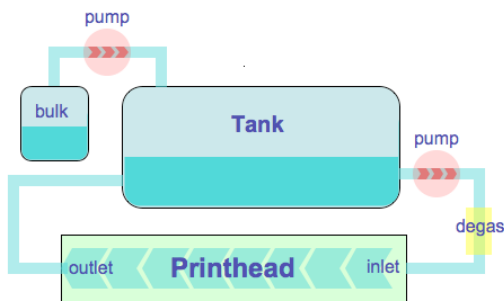

ImageXpert Recirculating Ink Supply

Fully integrated recirculating ink supply system

A Low-Cost, Low-Volume Ink Supply system
Built For Labs.

FEATURES AND BENEFITS

The CIMS II Vortex Recirculating Ink Supply is a closed loop system that automatically maintains user-adjustable inlet and outlet pressures.

System includes:

- Fully-assembled ink supply unit with reservoir, fill pump, heater, and pressure sensors
- Mounting for easy integration with JetXpert
- Workstation with software interface
- Optional degas unit, including vacuum pump and membrane
- Optional inline heater
- Compatible with recirculating and non-recirculating print heads such as: Dimatix, Xaar, Kyocera, Ricoh, Toshiba Tec, Konica Minolta and more
- Works with a wide range of fluids including: aqueous, solvent, and UV-curable inks
- Software-adjustable meniscus pressure, recirculation, and temperature
- Small 100ml internal volume, perfect for lab environment
- Ink level sensor for automated tank refill
- Real time flowrate readout
- Degas unit, filter, and external heater options
- Available as a stand alone unit or as an add-on to JetXpert systems
