

# JetXpert Stitch Analysis Option

Drop formation in a single image

## FEATURES AND BENEFITS

The Stitch Analysis Tool for JetXpert automatically records drop formation in a single image

- Easy to use - runs quickly and easily from a user friendly GUI, according to simple user-defined parameters, including number of drops to record, and step size.
- Convenient - images can be easily embedded, emailed, and shared.
- Repeatable - information about test parameters, including timestamp and calibration are automatically recorded with the image.

## Empowering Drop Analysis

- Observe and measure key characteristics of drop formation, including ligament length and satellite formation.
- Clearly and quickly see the impact of changing ink formulations and waveforms on drop formation.
- Perfect for marketing, and for collaboration with customers and colleagues.
